The default view of the web listing of all prequalified vaccines is a table view in alphabetical order by vaccine type.

Prequalified	Type	Commercial Name	Pharmaceutical Form	Presentation	No. of Doses	Manufacturer	Responsible NRA
01/01/1987	BCG	BCG Freeze Dried Glutamate vaccine	Lyophilised active component to be reconstituted with excipient diluent before use	Ampoule	20	Japan BCG Laboratory	Chiba Local Government
01/02/1991	BCG	BCG Vaccine	Lyophilised active component to be reconstituted with excipient diluent before use	Ampoule	10	National Center of Infectious and Parasitic Diseases	Bulgarian Drug Agency
01/02/1991	BCG	BCG Vaccine	Lyophilised active component to be reconstituted with excipient diluent before use	Ampoule	20	National Center of Infectious and Parasitic Diseases	Bulgarian Drug Agency
29/05/2003	BCG	BCG Vaccine	Lyophilised active component to be reconstituted with excipient diluent before use	Vial	20	Serum Institute of India Pvt. Ltd.	Central Drugs Standard Control Organization
06/11/2015	BCG	BCG vaccine (Freeze Dried) - Intradermal	Lyophilised active component to be reconstituted with excipient diluent before use	Vial + Ampoule	20	Green Signal Bio Pharma Pvt., Ltd.	Central Drugs Standard Control Organization
01/01/1987	BCG	BCG Vaccine SS1	Lyophilised active component to be reconstituted with excipient diluent before use	Two vial set (active + excipient)	10	Statens Serum Institut	Danish Medicines Agency
25/10/2001	cholera: inactivated oral	Dukoral	Liquid: ready to use	Vial + Buffer Sachet	1	Cruceil Sweden AB	Medical Products Agency
23/12/2015	cholera: inactivated oral	Euvidiol	Liquid: ready to use	Vial	1	Eubiologics Co., Ltd.	Ministry of Food and Drug Safety Central

The columns shown in this table are:

- Prequalification Date
- Vaccine Type
- Commercial Name
- Pharmaceutical Form
- Presentation
- Number of Doses
- Manufacturer
- Responsible NRA

The user can re-sort the table by clicking on any of the column headings.

At the top right of the table is an indication of the number of currently prequalified vaccines and the number of presentations (some vaccines have more than one presentation, (eg 1 dose, 5 dose and 10 dose presentations))

234 presentation(s) for 141 vaccine(s)

At the top left of the table is a date showing the last update of the list of prequalified vaccines.

Last updated: 17/02/2016

This date is generated automatically and reflects the last edit of the database used as the source for the displayed information.

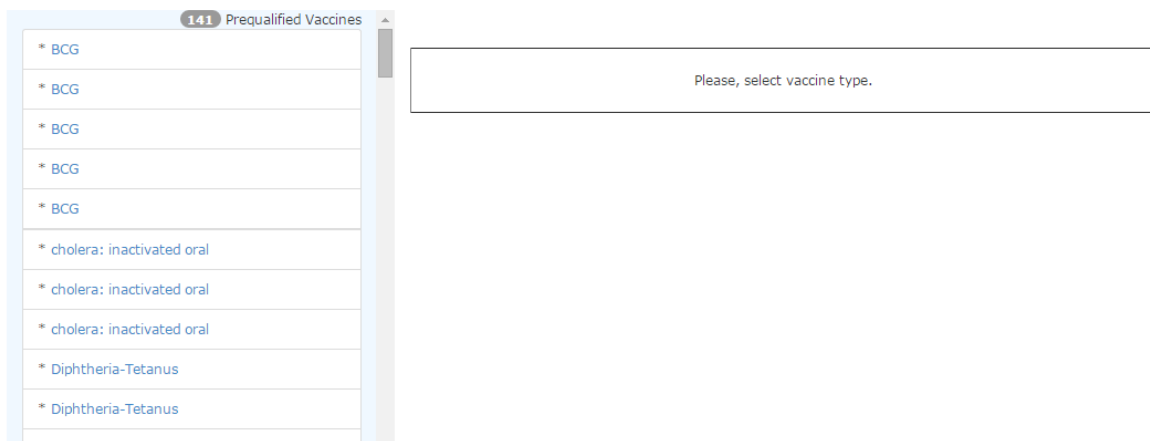

The text in the commercial name column is a hyperlink to the [detailed page for the vaccine](#).

Under the banner at the top left are choices on how the user wishes to view or search the data.

Browse prequalified vaccines

When this is clicked, the following appears:

It shows entries on the left for each prequalified vaccine, listed by type.

When the user clicks on a vaccine in the column, further details about the vaccine is displayed to the right

The text under presentation is a hyperlink to the [detailed page for the vaccine](#).

Advanced search

When the user selects advance search the following page appears:

This page allows the user to select one or more parameters and then view a filtered list of vaccines matching those parameters.

Prequalification

Define date range or either one of these dates if you would like to display only prequalified vaccines within a certain period.

Prequalification Date: (dd/mm/yyyy) **From:** **To:**

Product Overview

Define your filter criteria by clicking select and select item(s) from the dialog box that will appear and then click Add. To remove item(s) from the list select the item(s) and then click Remove.

Vaccine Type(s): Select... [< Remove](#) [<< Remove All](#)

Commercial Name:

Manufacturer(s): Select... [< Remove](#) [<< Remove All](#)

Responsible NRA(s): Select... [< Remove](#) [<< Remove All](#)

Prequalification date selection.

When the user clicks the box, a pop-up calendar appears.

Entering both a “from” and “to” date will filter for vaccines prequalified within that range.

Selecting only a “from date” will select vaccines PQed on or after that date.

Selecting only a “to date” will select vaccines PQed on or before that date.

Vaccine type, Manufacturer, Responsible NRA selection

If the user clicks on select next to “vaccine type”, a pop-up list of PQed vaccines is displayed.

Vaccine Type(s):

- BCG
- BCG ONCO
- cholera: inactivated oral
- Diphtheria-Tetanus
- Diphtheria-Tetanus (reduced antigen content)
- Diphtheria-Tetanus-Pertussis (acellular)
- Diphtheria-Tetanus-Pertussis (acellular) [reduced antigen content]
- Diphtheria-Tetanus-Pertussis (acellular)-Hepatitis B-Haemophilus influenzae type b-Polio (Inactivated)
- Diphtheria-Tetanus-Pertussis (whole cell)
- Diphtheria-Tetanus-Pertussis (whole cell)-Haemophilus influenzae type b
- Diphtheria-Tetanus-Pertussis (whole cell)-Hepatitis B
- Diphtheria-Tetanus-Pertussis (whole cell)-Hepatitis B-Haemophilus influenzae type b
- Haemophilus influenzae type b
- Hepatitis A (inactivated)
- Hepatitis B

Hold down **Ctrl** to select multiple items.
Add All >> Add >

Cancel

One or more vaccines can be selected, as indicated on screen.

In the same way, the user can select manufacturer or responsible NRA from lists which appear when “select” is pressed.

If the user wants to remove a selected vaccine type/manufacturer/responsible NRA, click on the name to highlight it and then click on “Remove”.

The user can search by commercial name by typing all or part of the name in that field.

Further details of the vaccine can also be used to filter the displayed list

Product Description

Fill in a product description parameter value(s), if you would like to display only vaccines with matching values.

Pharmaceutical Form:

Presentation:

Number of Doses:

Diluent:

Route of Administration:

Shelf Life:

at storage temperature:

Vaccine Vial Monitor:

Preservative:

Free Text *:

* Search within the below vaccine product description parameters for this text:
Secondary Packaging\ Tertiary Packaging\ Cold Chain Volume\ Preservative Concentration

The following parameters can be chosen from drop down lists which display when the mouse is clicked in the field:

- Pharmaceutical form
- Presentation
- Diluent
- Route of Administration

Shelf Life
Storage temperature
Vaccine Vial Monitor Type
Preservative

The user can add a filter parameter “Number of Doses” by typing in that field

A further field allows free text input and will filter based on matching parameters in any of the following fields of the database (secondary packaging; tertiary packaging; cold chain volume; preservative concentration). Partial text matches are possible (eg an input of 14 would match to a record with 14.7).

[Filter](#) [Print Preview](#) [Clear Filter & Display All](#)

Last updated: 18/02/2016 164 presentation(s) for 100 vaccine(s)

Prequalified	Type	Commercial Name	Pharmaceutical Form	Presentation	No. of Doses	Manufacturer	Responsible NRA
25/10/2001	cholera: inactivated oral	Dukoral	Liquid: ready to use	Vial + Buffer Sachet	1	Crucell Sweden AB	Medical Products Agency
23/12/2015	cholera: inactivated oral	Euvichol	Liquid: ready to use	Vial	1	Eubiologics Co., Ltd.	Ministry of Food and Drug Safety

After search parameters are entered, click on “Filter” and a table of results shows vaccines which match the search criteria.

The number of vaccines (and presentations) which match the criteria is displayed.

The text in the commercial name column is a hyperlink to the [detailed page for the vaccine](#).

A printable version of this list can be generated by clicking “Print Preview”.

Reference 265.1 19/02/2016

 **World Health Organization** Hepatitis A (inactivated)
Havrix 720 Junior

Product Overview:

Type:	Hepatitis A (inactivated)	
Commercial Name:	Havrix 720 Junior	
Manufacturer:	GlaxoSmithKline Biologicals SA	
Country:	Belgium	
URL:	www.gsk.com	
Responsible NRA:	Federal Agency for Medicines and Health Products	
Country:	Belgium	
URL:		
Bulk Supplier:		

Prequalification:

Prequalification Status:	Current
Effective Date (dd/mm/yyyy):	19/07/2013

(webpage display continues on next page of this help document)

Product Description:

Pharaceutical Form:	Liquid: ready to use	
Presentation:	Vial	
Number of Doses:	1	
Diluent:		
Route of Administration:	Intramuscular	
Shelf Life:	36 months	at storage temperature: 2-8°C
Vaccine Vial Monitor:	Type 30	
Secondary Packaging:	carton of:100 vials with dimensions 17.8 x 14.7 x 3.7 cm; carton of 25 vials with dimensions 9.9 x 7.7 x 3.7 cm; carton of 10 vials with dimensions 8.4 x 3.7 x 3.7 cm; carton of 1 vial with dimensions 3.1 x 3.1 x 6.0 cm	
Tertiary Packaging:	Insulated Shipping box: 34 x 25 x 43 cm: Containing 24 cartons of 100 vials (2400 doses of vaccine); 96 cartons of 25 vials (2400 doses of vaccine); 240 cartons of 10 vials (2400 doses of vaccine); or 420 cartons of 1 vial (420 doses of vaccine)	
Cold Chain Volume:	9.6; 11.3 ; 11.5; 57.7	cm³/dose (in secondary packaging)
Preservative:	none	with concentration:
Handling of opened multi-dose vials:	Not Applicable.

Attachments (product insert, further container images, public summary assessment report, etc) can be viewed by clicking on the icon under the column heading “View”.

At the top of each page are two hyperlinks. One takes the user directly to the attachments list at the bottom of the page.

Feedback

The second allows the user to provide feedback to the PQT/Vaccines Assessment Group. This can be used in case further information is required concerning a vaccine. If the user finds any errors in the displayed information PQT/VXA would appreciate receiving your feedback so that these can be corrected.

The user enters their name and email address and details of the feedback. The user also needs to type the series of letters and numbers displayed into the field below them. This is for spam prevention. If the user has difficulty reading one set of these, by clicking the icon to their right, a new set of numbers and letters appear.
